

Product Sheet: Expandable Junk Catcher Add-on (EJC-A)

Product Description

Our Expandable Junk Catcher Add-on (EJC-A) is an add-on feature to our existing Bridge Plugs.

It will ensure that potential junk is caught inside a basket on top of the plug, and it will ease the retrieval of plugs in debris challenging operations.

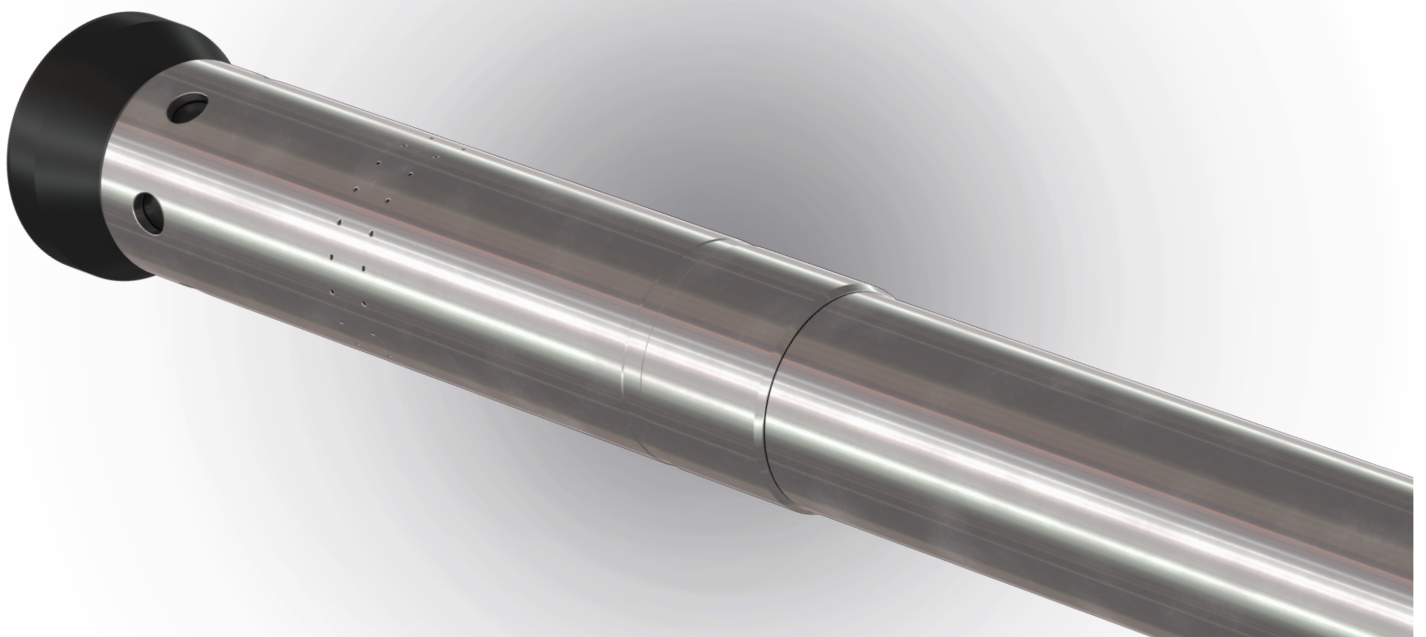

You will be able to do both setting and retrieving of EJC-A + Bridge Plug in only one run. The EJC-A + Bridge Plug is set with a standard setting tool, and is designed with a GS style fish neck for retrieval from the wellbore.

Product Application

The Expandable Junk Catcher Add-on provides a safe solution to effectively collect debris within the wellbore.

Product Benefits:

When assembled to Bridge Plug the EJC-A funnels debris into catcher where a flapper keeps debris separated from Plug

Product Sheet: Expandable Junk Catcher Add-on (EJC-A)

Product Features

- Innovative swab-cup that effectively funnels debris into the catcher
- Both setting and retrieving of EJC-A + Bridge Plug is done in one run
- Can be run on Wire Line
