

Product Sheet: Tubing Packer (TP)

Product Description

The Tubing Packer (TP) is a packer for hanging off heavy loads in the well. The loads are carried via the packer main mandrel and the setting tool mandrel into the running string. This is achieved without interfering with the setting compression forces required for the element sealing. Hence, the tested and well proven technology from our standard plug and packer program is applied.

Product Application

The TP is ideal for hanging off heavy velocity strings, screen sections and swell packer sections in the well.

Product Benefits:

The Tubing Packer (TP) uses well proven technology.

By carrying the loads via mandrels into the running string, heavy loads can hang off the packer in the well.

Product Sheet: Tubing Packer (TP)

Product Features

- Heavy load capability
- Ideal for workover applications
- Excellent candidate for wells with scale build-up
- Retrieve with std GS in a single operation (no prong needed)
- Can be run on CT and Pipe
- Medium expansion technology
- Other sizes available upon request
