

Case Study: 440-700 High Expansion (HEX) Straddle

Date:

January 2012

Region/Field:

Nort Sea

In January 2012 a 440-700 HEX (set in 7" - 26#) Straddle was pulled, after being installed in the well for 4 years. The straddle was pulled with stoker, through a 4.56" ID restriction. Straddle was pulled because of a permanent P&A.
