

Interwell Compliance Program

Our Compliance Program is designed to anchor the Interwell way in how we do business and create sound platforms to ensure sustainability and to govern and demonstrate our corporate social responsibility.

Due Diligence

Part of our Compliance Program is conducting Due Diligence to any 3rd party. We are committed to doing business with integrity and transparency is a key element.

What to expect

 Interwell Global Compliance Officer will contact the nominated person from your company.

 Our Due Diligence consists of a questionnaire that we ask to be answered truthfully and to the best of your knowledge.

 Once completed and returned there may be clarifications to be made, additional questions or further documents requested.

 When the DD is concluded, the business case will be subject to an internal approval process before any contractual commitment is made.

For any questions please contact IW Global Compliance Officer.

Transparency and Trust

Interwell values are Agile, Creative, Driven and Caring.

We are proud of our integrity and zero tolerance to any unethical behavior and unsafe acts.

We believe in transparency and trust to be able to grow and sustain our business.

Interwell

Serving Every Well
