

Interwell Corporate Social Responsibility (CSR) Program

Interwell strive to be better every day, by living our values and being part of a community.

To continue improving we need to ensure expectations with our stakeholders are aligned and we create two-way dialogues.

Providers

Our supply chain is an important aspect of our social responsibility.

How do we work with our providers?

- We expect all our providers to be familiar with the Interwell CSR Statement.
- Interwell categorize our providers based on type of services and how they affect our business. This determines requirements, level of approval and follow-up activities.
- Our most significant providers are audited and annually evaluated. The overall assessment is based on many factors, amongst them, CSR.

Transparency and Trust

Interwell values are Agile, Creative, Driven and Caring.

We are proud of our integrity and zero tolerance to any unethical behavior and unsafe acts.

We believe in transparency and trust to be able to grow and sustain our business.

Interwell

Serving Every Well

What to expect

The CSR Assessment

The size and impact (local and/or global) of the provider will be considered during the assessment.

Interwell audit

The questions derive from the same standard and requirements Interwell is held accountable for. We understand that these may seem comprehensive, and we do not expect all our providers to work in the manner we do. The questions help us evaluate how our providers assess their own impact, in which way they handle core social responsibility subjects, further potential and improvement as well as possibilities to learn from each other.

Main Goals

- Awareness
- Dialogue
- Active commitment and involvement
- Learning

Interwell follow Sustainable Procurement & Corporate Social Responsibility Guidelines

ISO 20400 & ISO 26000
