

Matrix Platform Retrievable Bridge Plug (MP)

Description

The MP is a new generation retrievable bridge plug series. It's one of the shortest retrievable bridge plugs in the industry, with a relatively small element expansion, and is meant for applications above well restrictions. It's qualified according to the ISO 14310 international standard.

The design of the MP is a result of over 20 years of innovative experience.

Application

The MP is a retrievable bridge plug that has applications in any phase of a well's life cycle. It can be used as a temporary well barrier during well construction phase, or for workover applications such as wellhead repair or tree repair. It can also be used during water shut off or as a permanent well barrier during the plugging and abandonment (P&A) phase.

Matrix Platform Retrievable Bridge Plug (MP)

Benefits

- One of the shortest retrievable bridge plugs in the industry.
- Re-dress capable in field.
- Robust construction.
- Cost effective.

Technical Specifications

Model	Csg Size	Csg Wt (lbs/ft)	OD	GS	Min Setting ID	Max Setting ID	Pressure Rating	Temperature Rating
